

Lead & Steel is at the forefront of innovation, encapsulating the entire weapon ecosystem through modern material science and unparalleled quality. Boasting over three decades of engineering prowess, the passion for excellence permeates every product offered.

Lead & Steel was born as an optical engineering firm, noting the shortcomings in the current professional standards and determined to surpass expectations. Leveraging lens simulation software, finite element analysis, and thorough destructive testing, every aiming system is built to withstand any mission.

As optics were produced, the need for capable hosts emerged, following the same driving principles invested into the optical offerings. Developed for resilience in hostile environmental conditions—including extreme temperature, submersion, and impact forces—every rifle proudly bears the Lead & Steel badge.

Current offerings are dictated by need, with product introductions and evolutions constantly in flux. As our manufacturing capacity continues to expand, so does our flexibility to design weapon systems tailored to our client's needs.

Lead & Steel offers custom specifications to meet your department's operational requirements. Additional configurations and customized adjustments are available to enhance agency efficiency.

PRO PATROL READY ORDNANCE

PRO 11.5"

LEAD & STEEL TACTICAL RIFLE SYSTEM

The Patrol Ready Ordnance, or PRO series, is specifically catered to the first responders holding the front line of defense. By leveraging networks of law enforcement feedback across the country, the PRO series eliminates unnecessary features to deliver what truly matters: uncompromising dependability.

Built from the inside out, the PRO series features a precision-engineered bolt carrier group and a sub-MOA barrel at its core. Enhanced with our single-stage trigger for superior accuracy and controlled firing rates, ergonomic furniture for optimal handling, and a Type III hard coat anodized finish for extreme durability, the PRO series is the preferred backup for the unpredictable.

ARC ALL-ROUNDER CARBINE

The All-Rounder Carbine (ARC) was born from a solicitation to develop a rifle with a resilience to extreme environmental conditions.

The beating heart of the ARC is the Monobloc barrel, a patented barrel design that dismisses the failure-prone "gas block" traditionally employed by the M16/M4 gas system and offers a one-piece architecture that dramatically increases service life, and simplifies supply logistics with a backwards-compatible, one-and-done solution.

Most notably, the ARC's Monobloc barrel reduces the possibility of a catastrophic gas system failure if the operator is subject to the kinetic shockwave of a roadside or vehicle-borne Improvised Explosive Device (IED), Rocket Propelled Grenade (RPG), or other field explosive.

PROMETHEAN LP-1 THE #1 CHOICE FOR HARSH ENVIRONMENTS.

The Promethean LP-1 is our rugged optic engineered for duty use. Tried and tested by countless law enforcement departments globally, the LP-1 is ready when you need it most.

- Parallax Free, Unlimited Eye Relief
- IPX-8 Waterproof
- Durable 7075-T6 Aluminum Housing
- 6061-T6 Protective Crumple Hood
- Assembled in the USA

Replacement Hoods available in Black, Olive, Earth and Charcoal.

RETICLES

2 MOA DOT 65 MOA RING 2 MOA DOT + RING

FEATURES

- Japanese lenses with unmatched clarity and light transmission
- Quick Detach Mount
- Adjustable LED Reticle, with 7 Daylight and 3 Night Vision Settings
- Powered by a single CR123A cell for 150,000 continuous runtime with 2-MOA dot reticle (Setting 5/10)
- Large Window for Fast Target Acquisition (1.37" x 1.04")

PB-3 DUTY RATED, SCIENCE DRIVEN.

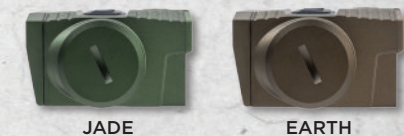

PANDORA'S BOX 3 MOA

The PB-3 is built for durability in hostile environments. And with best-in-class window size and battery life, the Pandora is always ready for force application.

- Parallax Free, Unlimited Eye Relief
- IPX-8 Waterproof
- Durable 7075-T6 Aluminum Housing
- ACRO® P2 footprint
- Assembled in the USA
- 3 MOA red reticle

ALSO AVAILABLE IN

JADE EARTH

STANDARD FEATURES

- High Performance Coating, Multi-Coated Lenses
- Sealing Plates for Added Security
- Beveled Edge of Battery Compartment
- 7 Daylight and 3 Night Vision Settings
- Powered by a single 3V CR2032 for 30,000HRS Continuous Runtime
- Ocular Offset to Protect Glass
- 30% Larger Window than Aimpoint ACRO® P2 (21x17mm)
- 0.5-MOA Adjustment for Windage & Elevation
- Weighs 2.3oz
